## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a method of manufacturing semiconductor devices, classified in class 438, subclass 618.
  - II. Claims 7-10, drawn to an apparatus for manufacturing semiconductor devices, classified in class 414, subclass 271.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus in the invention of Group II can be used to practice another and materially different process such as a method of manufacturing semiconductor devices which does not include at least the steps of making a first concavity in a first insulating film on a surface of a substrate; burying the first concavity covered with the barrier layer for the purpose of preventing metal diffusion with wiring metal; polishing the substrate to remove a part of the metal residing higher than the upper peripheral level of the first concavity so as to leave a first metal layer in the first concavity.
